

PROFESSIONAL SUMMARY

Final-year Computer Science student at the University of Leicester on track for a First-Class degree, with hands-on experience in cybersecurity and software development. Certified by Google in network security, incident detection, and threat mitigation, with practical skills in Python automation, Linux, and SIEM tools. Proven ability to deliver under pressure, 1st place at Capital One Hackathon. Seeking a graduate role in cybersecurity to contribute to threat detection and digital resilience.

TECHNICAL PROJECTS

- Deepfake Detection System

Oct 2025 - Apr 2026

Final Year Project · Python, PyTorch, FastAPI, Docker, OpenCV

 - Designed a forensic analysis pipeline processing 14,000+ videos into 447,000+ face images for model training.
 - Trained and benchmarked multiple detection architectures: XceptionNet, EfficientNet-B4 ensemble, and LSTM temporal modelling.
 - Achieved 91.54% AUC on WildDeepfake and 71.61% AUC on DFDC out-of-family evaluation, demonstrating strong real-world robustness.
- Cloud Infrastructure & Network Security

Oct 2025 - Dec 2025

GCP, Kubernetes, Prometheus, Grafana

 - Deployed a private cloud on GCP, configuring a distributed Kubernetes cluster across 3 availability zones.
 - Configured VPC firewall rules and network segmentation, restricting access to Kubernetes API, kubelet, and consensus ports.
 - Set up Prometheus and Grafana monitoring stack across 3 VMs for real-time observability of CPU, memory, and network metrics.

COMPETITIONS & AWARDS

- 1st Place - Capital One Hackathon

2024

Built Campus Essentials Locator, a web app helping students find campus resources. Won 1st place among all competing university teams.
- 3rd Place - IBM Hackathon

2025

Developed Study Buddy, a study session platform using Java 17, Spring Boot, Firebase, and Vanilla JS. Features: smart session matching, real-time chat, join request system, and user ratings. Deployed on Railway.

EDUCATION

- BSc (Hons) Computer Science - Predicted First-Class

Sep 2023 - Jun 2026

University of Leicester, United Kingdom

Key module results:

Foundations of Cybersecurity 90% | Project Management 94% | Software Architecture & Systems Dev 86% | Databases & Domain Modelling 83%
- Google Cybersecurity Certificate

Oct 2024

Google Career Certificates

 - Network security, incident detection and response, risk identification, threat mitigation, Python automation, Linux, SQL, and SIEM tools.

SKILLS

- Cybersecurity:

Network Security · Incident Detection & Response · SIEM Tools · Threat Mitigation · Log Analysis · Firewall Concepts
- Programming:

Python · Java · JavaScript · HTML/CSS
- Frameworks & Libs:

PyTorch · FastAPI · Spring Boot · OpenCV · Pandas · scikit-learn · Firebase
- Tools & Platforms:

Git · GitLab · Linux · Docker · Kubernetes · GCP · SQL

LEADERSHIP & ACTIVITIES

- Founder & President - Salsa Society, University of Leicester

Aug 2024 - Present

University of Leicester

 - Founded and scaled the society to hundreds of members; achieved 90% event participation rate.
 - Managed all communications, scheduling, promotion, and stakeholder coordination.
- Languages:

Spanish: Native | English: Native
